

INJECT-O-METER

fertilizer injection pumps for greenhouses

We have designed the “perfect” fertilizer injection pump for the green industry. Tired of water driven plastic injectors that are continuously needing repair. Examine the Inject-O-Meter line of fertilizer injection pumps. Made of 316 SST and powered by electricity, the fertilizer injector can be set up to turn on when your sprinkler system does. The pump features a manual injection rate or the unit can be designed to inject fertilizer proportionally to water flow. We offer various application rates from 2 gph - 328 gph. Simple, reliable, and accurate are the words most commonly used by customers that use the Inject-O-Meter fertilizer injection pumps. Inject-O-Meter has been manufacturing fertilizer injection pumps since 1965. We are the worldwide leader in the “fertigation” business
