

INJECT-O-METER

multi-directional chemigation check valve

MAX-94 Check Valve

The Max-94 injection check valve is the entry point for your chemicals into the irrigation line. The Max valve is designed to improve the distribution of chemicals into the waterline with a multi-directional atomizing spray. If you are tired of continually replacing other "plastic" chemigation valves, give the MAX-94 a try. Remember MAX-94.....

MAXimum value at a minimum price.

MAX-94 Benefits:

- Multi-Directional spray pattern
- Made of 316 SST "no more busted plastic valves, Mister"
- Meets all State and Federal Regulations
- Positive Seating Action
- Designed to Continuously Clean Internal Parts
